

MR. OTEK SIGN & TEXTILE INTRODUCES A RETRACTABLE GOLF CAR TOP!

Mr. Otek Sign & Textile, of Mishicot, Wisconsin, a division of M.O.S.T., Inc., has introduced the Sun Topper, a retractable golf car top which offers many advantages over conventional tops. Mr. Otek Sign & Textile designed and developed the top after the company's president, William Mrotek, was approached by a golf car fleet manager who wanted to save time by not having to remove the hard top from all of their golf cars in order to transport them. He mentioned that they had to remove all the hard tops, ship them separately and reinstall them on location.

After designing several prototypes, William Mrotek and his staff created the perfect retractable top, one that would stay inside the bumper and also fit below the steering wheel. The retractable top is made of stainless steel with a patented articulating hinge that will clear golf clubs and bags, and features a cover that is Sunbrella acrylic cloth. Mr. Otek Sign & Textile chose Sunbrella because they have been using this fabric for over 25 years and know that with constant use this

material will stay soft and pliable regardless of the weather. It also is very attractive.

The popularity of the new Sun Topper retractable top is not limited to fleet operators for ease of transport. Private car owners, especially those in gated communities who use a golf car for transportation, love the retractable top. It's fun, like driving a convertible automobile. Everyone who has seen the retractable top is impressed with it and feels it would be great for the golf course too.

The Sun Topper retractable top goes up and down in a snap and is available with accessories or options. There is a protective cover bag with a zipper and a valance option which provides even more protection while adding classy good looks. For personal impact, a corporate name or logo all done in house, can be added.
